HIGHLIGHT OF QUALIFICATIONS

- **Languages:** JavaScript, Node.js, React.js, C, C++, Python (ArcPy), HTML, CSS, SQL
- **Databases:** MongoDB, PostgreSQL, Oracle 12c, Microsoft Access
- **GIS Tools:** QGIS, ArcGIS, Leaflet, FME
- **Dev Tools & Environments:** Git, GitHub, Linux, MS Visual Studio, VS Code
- **Office & Productivity:** Word, Excel, PowerPoint, Outlook
- **Other:** JWT Authentication, RESTful APIs, Unit Testing, Agile, QA, Spatial Analysis

RELEVANT PROJECTS

Met Artwork Web Application | Seneca Polytechnic | Next.js, Node.js, MongoDB | Jan 2025 – Apr 2025

Link to the App : [MetArtWorkApp](#)

- Developed a full-stack web application via The Met Museum API to fetch artwork information
- Implemented secure user authentication through JWT and created an easy-to-use login/register interface
- Created favourite and search history management functionality, storing data with MongoDB Atlas
- Utilized modern React hooks and Recoil for state management and deployed the application on Cyclic

Ontario Pre-Triage Application | Seneca Polytechnic | C++ | Jan 2024 – Apr 2024

Link to the GitHub repository: [OntarioEmergencyApp](#)

- Created and implemented a C++ console-based patient intake app to assist in triaging emergency patients
- Used object-oriented principles and incorporated file I/O to handle patient records
- Used modular design for ease of testing and maintenance

Veterinarian Clinic System | Seneca Polytechnic | C | Sept 2023 – Dec 2023

Link to the GitHub repository: [VetClinicApp](#)

- Developed a command-line application of a clinic management system in C for appointment scheduling and patient record management
- Applied structured programming and rigorous unit tests to ensure reliability and usability

Weather Application | Arubrum Innovations | Python, QGIS, PostgreSQL, Leaflet | Jan 2021 – Jun 2021

Link to the GitHub repository: [WeatherApp](#)

- Developed a web-based weather mapping application that visualized climate data interpolated in Ontario
- Built spatial database in PostgreSQL and automated ETL pipeline for weather information
- Developed interactive web-based geovisualization using Leaflet.js and QGIS

EDUCATION

Computer Programming and Analysis (Co-op) - Advanced Diploma Sept 2023 - Present
Seneca Polytechnic, Toronto

- **CGPA: 3.9/4.0**
- Relevant Coursework: Object-Oriented Programming using C and C++, Operating Systems, Data Structures and Algorithms, Web Programming, Database Systems, Software Testing
- **President's Honors List: Term GPA 4.0/4.0**

Geographic Information Systems (Applications Specialist) - Graduate Certificate Graduated July 2021
Fleming College, Peterborough

- Relevant Coursework: Web GIS Development with Python/ArcPy, GIS Database Development, Spatial Analysis, Surveying and CAD Mapping, Geovisualization, Remote Sensing/ Image Analysis
- **Outstanding Achievement Award** from the Dean of School of Environmental & Natural Resource Sciences

WORK EXPERIENCE

Barista | Mos Mos Coffee, Toronto Aug 2023 – Present

GIS Applications Specialist, Collaborative Project

Arubrum Innovations, Toronto Jan 2021- July 2021

- Designed an interpolated weather model of Ontario using QGIS and PostgreSQL and developed an online weather map/report using open-source technologies such as Leaflet
- Configured a highly functional and efficient ETL workflow to pre-process the data
- Coordinated weekly meetings with team members, clients, and advisors, while collaborating with internal and external teams to ensure successful project outcomes
